Q DE BOUTEILLES
GLASS UPCYCLING MANUFACTURING
SINCE 2016

**At Q DB, we are specialized in the upcycling of glass containers. Many beverage and perfume brands entrust us with their glass bottles so that we can offer them a second life.**
**Thanks to its expertise, our team is there for you to find the best answer and solution, according to your wishes and needs.**

HISTORY

# HISTORY

## FROM THE BOTTLE BY THE GLASS

At the beginning of Q de bouteilles, there is no strategy but a fleeting vision. A simple idea the day after an evening with some friends, the idea of cutting a wine bottle in two in order to turn it into a glass. For Victoire and Gauthier, Q DB's founders, upcycling is at the foundation of the brand's history, just as the CSR aspect is at the basis of their business logic.

Q de bouteilles uses the iconic glass bottle within the respect of its history and its use.

HISTORY

# HISTORY

## A BASIC FORM YET A SOLID MATERIAL

When cutting a glass bottle into a glass, Q de bouteilles recycles the glass of course, but also creates a whole new story. Glasses, vases, candles... beneath its apparent simplicity each piece is unique and made to last.

**Each collection has its history,**
**each object its mark,**
**each memory its perfume.**

CANDLE

# CANDLES

Q bottle candles are the materialization of childhood memories shared with our grandparents, sweet and happy moments. Hand in hand with the “Nez” of Grasse, we brought out from our memories the fragrances contained in our three candles. The vegetable wax is poured in our workshop located in Le Touquet and the containers are manufactured with the same skill as our glasses and vases.

Once the candle is burnt, the container is reusable into a Q DB glass, just like the mustard jars our grandparents used to keep!
