

Q DE BOUTEILLES

CATALOG

Q DE BOUTEILLES is a French and family owned business, that designs and manufactures objects of decoration and tableware.

Since 2016, more than 550,000 bottles have been upcycled thus finding new functions on your tables and inside your homes.

The Q DE BOUTELLES collections are part of a sustainable approach.

Our preferred material is the glass, a recycled and recyclable material, which we shape in our manufacture in Le Touquet (North of France), according to an energy efficient production process.

« OUR AMBITION IS TO CREATE TOMORROW'S
CLASSICS FROM RECYCLED MATERIALS »

VICTOIRE & GAUTHIER DECARNE

DURABLE DESIGN

When cutting a glass bottle into a glass, Q de bouteilles recycles the glass of course, but also creates a whole new story.

Glasses, vases, candles...

beneath its apparent simplicity each piece is unique and made to last.

SUMMARY

Each collection has its history,
each object its mark,
each memory its perfume.

TABLEWARE

Any dish or dishware used for setting a table, serving food, and dining.

PLATTER

A large flat dish or plate for serving food.

Since 2020, we've been extending our expertise to include thermoforming.

Thermoforming: N.m. Thermoforming is the process of bending glass and giving it another shape using heat and gravity.

In this way, we deform the bottle to give it another function. Whether you're looking for an empty pocket, an object of curiosity or a presentation board, we've got you covered.

CANDLE

Wax surrounding a wick, the combustion of which produces an illuminating flame.

PERFUMED CANDLE

Perfume : aromatic substance that is pleasant to the sense of smell.

A veritable Madeleine de Proust, our candles contain three childhood memories shared with our grandparents. They are cast in our workshop and once burnt, they turn into glass, just like the mustard jars of our childhood.

MALÀKIO

ALÀKIO collects its raw materials from oyster farmers and restaurateurs in Brittany and Charente. After drying them naturally, they transform them in Nantes, where they make all their objects. The low-tech, no-cooking process and the proximity of the raw materials mean that this composite can be used to make one-off or mass-produced objects with a very low GHG footprint.
